

Create Telegram Bot Token

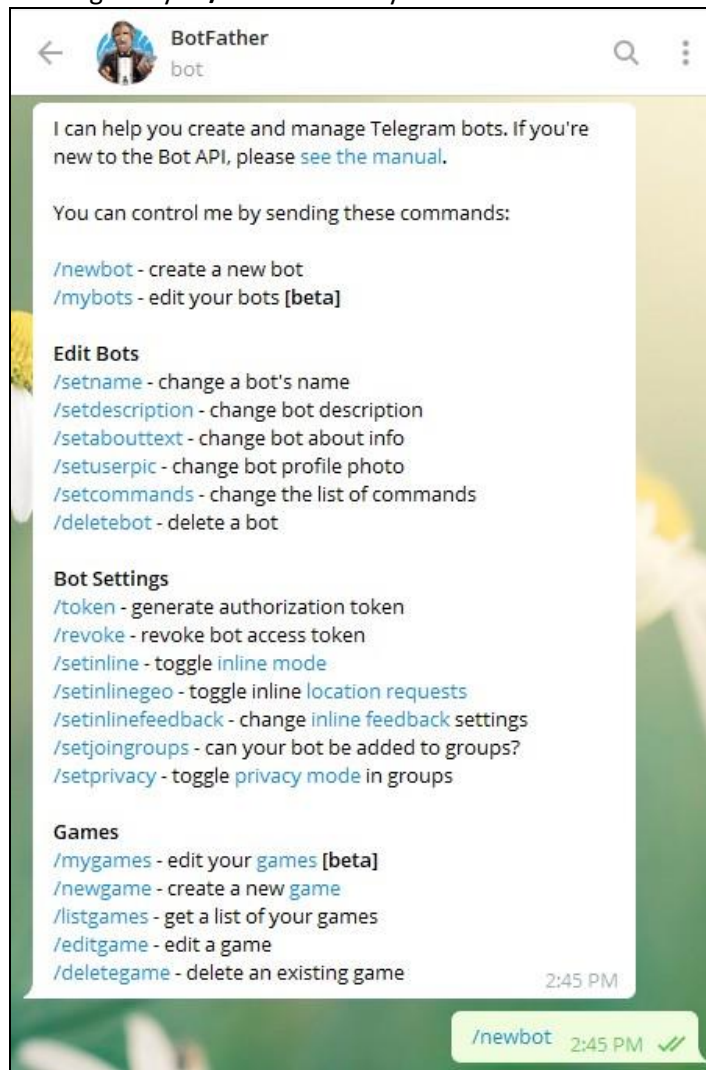

1. Open your Telegram app, search for **BotFather**

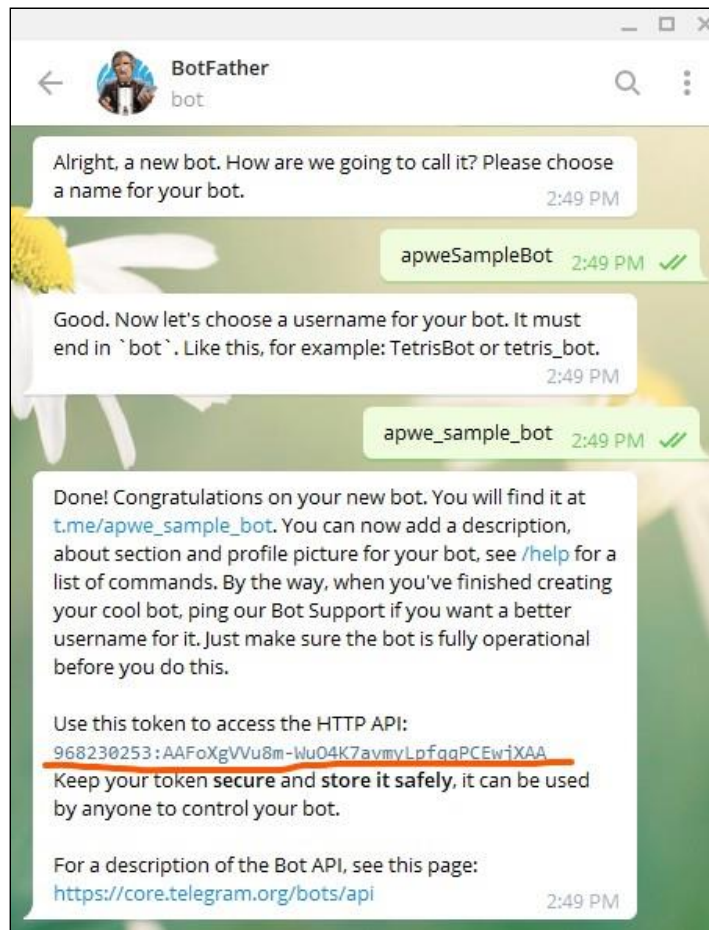

2. Click on the BotFather to open a chat, click on **START**

3. There will be a prompt message. Key in **/newbot** after you see it.

4. Name your bot however you want, but it would be good to relate to the function of your bot. The below is an example.

5. Take note of your token and **DO NOT lose it!** Also **DO NOT share** with others, else they will be able to control the behavior of your bot.
